

Bayesian Inference I – Prof. Sanguinetti

Information for students

16/10/2020

- IMPORTANT: ONLY SISSA FIRST YEAR PHD STUDENTS ARE ALLOWED TO ATTEND LECTURES IN PRESENCE. The number of people interested in the course is far higher than the covid-adjusted capacity of the room, and it seems anyway a good idea to reduce numbers as much as possible (I hope I'm wrong but I suspect this rule will be tightened further);

- everyone (including SISSA first year PhD students) is very welcome to attend online, the zoom link can be found at the bottom of this email, feel free to share it if you know of other interested people (hopefully we will not exceed the 300 limit!);

- IMPORTANT: ONLY SISSA FIRST YEAR PHD STUDENTS WILL BE ALLOWED TO TAKE THE EXAM. Everyone else is welcome to audit both lectures and labs. You should not be misled by the title Bayesian Inference I, some of the content of the course is not introductory;

- IMPORTANT: LAB CLASSES WILL BE FULLY ONLINE INCLUDING FOR FIRST YEAR PHD STUDENTS. It does not seem like a good idea to wander through desks. The lab classes will not require special hardware, a laptop with either matlab, R or python will do. I will release a lab sheet the day before the class, you are welcome to do the problems in your own time and only turn up (virtually) at the class to ask questions/ show me results. The zoom link will be the same as for the lectures.

- IMPORTANT: I will have a virtual office hour Fri 9-10am (same zoom link) if people have questions just feel free to pop in the virtual room. If you cannot do that time but do have questions, just email me and we can arrange another time.

- The zoom meetings will be recorded and shared (probably through onedrive).
