Art. 1

Positions open to competition

The following public selection procedure is held to assign 1 position of Researcher (Ricercatore a Tempo Determinato) for a three-year contract, full time, at the Physics Area of SISSA, in accordance with Art. 24, paragraph 3, letter a) of Italian Law No. 240 of 30.12.2010. The research activities shall focus on Green issues (Action IV.6), as foreseen by Ministerial Decree No. 1062 of 10.08.2021.

Project code (CUP): G95F21001210001
Scientific Area: Physics at SISSA
Academic Recruitment Field: 02/D1 Applied Physics, Physics teaching and history of Physics;
Academic Discipline: FIS/07 Applied Physics (Cultural Heritage, Environment, Biology And Medicine);
Area: Area 02 Physics;
Scientist responsible for the research activity: Prof. Alessandro Laio;
Research activity: We will develop a combined theoretical and computational framework to analyze persistent rare events in climate, in particular the so-called heatwaves and cold spells, whose temporal scales can easily reach one month and whose spatial scale can be continental or even global. The relevance of these events is twofold because, on the one hand, they are characterised by extremely fascinating multiscale dynamical processes and, on the other hand, they are among the most dangerous hazards in terms of impacts on human and environmental welfare, especially because of their long temporal duration and large spatial extent. We will base our investigation on real-world meteorological data, and on artificial data generated by state-of-the-art climate models. We plan to analyze these data with formal tools based on large deviation theory and stochastic processes theory in order to tentatively associate such extreme events with suitably defined instantonic trajectories in the high-dimensional phase of the system and define their properties with some degree of universality. Path finding algorithms based on rare event sampling will be key to improving our ability to characterize heatwaves and cold spells and better understand the underlying physical processes. Moreover, we plan to develop techniques from data science, specifically manifold learning, aimed at characterizing the data landscape to understand, within a fully agnostic and unsupervised framework, whether meteorological patterns associated with such persistent extreme events feature larger than usual local dimension, and to identify, in a coarse grained sense, the metastable states and basin boundaries associated with clearly recognizable weather patterns (e.g. blockings) that are typically responsible for the extreme events of our interest.
The research activities will be carried out in a company for a minimum of 6 months and a maximum of 12 months.

Maximum number of publications to be submitted: 12;
Language in which the evaluation of qualifications and publications will be held: English.
This selection procedure is conditional on admission to funding within PON “Research and Innovation”, as referred to in Ministerial Decree No. 1062/2021.

Art. 2

Candidates are admitted to the selection procedure with reserve, and can therefore be excluded at any time due to unfulfillment of the requirements through a Director’s decree. Candidates lacking the requirements listed in Art. 2 of this notice will be excluded from the selection.

Art. 6
Constitution of the Evaluation Committee
The Evaluation Committee is appointed by the Director of SISSA, on a proposal from the Area that has requested the position. The Committee is composed of three professors and at least two of them must be chosen from other Italian or foreign universities or other research institutions. The Committee will be appointed in accordance with current regulations on incompatibility and conflict of interest.

Art. 7
Duties of the Evaluation Committee
The Committee predetermines the criteria for the evaluation of the C.V. and the scientific production of the candidates, which includes the PhD thesis, according to criteria and parameters recognized at an international level, as defined by Ministerial Decree No. 243 of 25.05.2011. The criteria are published on the School’s website. The Committee will proceed with the evaluation expressing a reasoned analytical judgment of the C.V. and the scientific production of the candidate. All candidates will be admitted to the interview, if the total number of candidates is equal or less than six; otherwise, according to the results of the preliminary assessment, only the most qualified candidates will be admitted to the interview (in the measure of 10-20% of the total and, in any case, not less than six). No written or oral examination is required, with the exception of an oral test to prove an adequate knowledge of the English language, given that SISSA is an International School. The oral test will take place during the discussion on qualifications and publications. Till the end of the COVID-19 emergency situation, the meetings of the Evaluation Committee will be held using telematic devices. The Committee will have to meet...
via Skype (in conversation mode) or by using other telematic tools which can grant the actual participation of all the members, the simultaneity of decisions, the immediate possibility to access the acts, to intervene in the discussions, to exchange documents and approve reports.

At the end of the procedure, the Committee identifies the most qualified candidate for the position.

Art. 8
Interviews schedule

The interviews will be held online on **November 22nd, 2021**. A schedule of the interviews of the eligible candidates will be published on SISSA website at the following link: [https://www.sissa.it/recruitment?search=&status=3510&area=3362&posizione=3404](https://www.sissa.it/recruitment?search=&status=3510&area=3362&posizione=3404).

To all intents and purposes, the publication is equivalent to notification. No private notifications to candidates are envisioned.

The interviews will take place by using telematic tools, with audio and video connection among the Evaluation Committee and candidates so as to ensure the actual participation of and an effective interaction among Committee members and the candidate, with clear mutual comprehension and suitable methods of identification of the candidates.

Therefore, candidates admitted to the interview are expected to ensure that for the interview they will be equipped with a webcam – which is mandatory for identification purposes – microphone, speakers and/or headphones. At the beginning of the online interview, candidates must exhibit the same identification document sent with the application.

Art. 9
Verification of regularity of acts

The acts of the Committee consist of all the reports of the Committee, including the judgements expressed on each candidate’s qualifications, C.V. and scientific production, and a final report on the work carried out by the Committee. The Director verifies the regularity of the acts within thirty days from the submission of the documents by the Committee. If the verification has a positive outcome, the Director approves the Committee acts through a decree. If faults are identified, the Director sends the acts back to the Committee and indicates a deadline for their regularization.

All the acts regarding the procedure, including the report of the Committee on its work, and the judgements on each candidate are published on SISSA’s website. The School Council proposes the call of the candidate selected by the Committee to the Board of Directors. The proposal is adopted through a resolution with positive vote of the absolute majority of the Full professors and Associate professors (**professori di prima e seconda fascia**). The Board of Directors decrees on the call of the candidate selected by the Committee.
Art. 10

Constitution of employment

The contract of employment is signed by the researcher and the Director. The date on which the researcher will start his/her activity is communicated in writing by the Physics Area Council to the Administration.

In compliance with Ministerial Decree No. 1062 of 01.08.2021, researchers with fixed-term contracts (ricercatore a tempo determinato) have to carry out their research activity in a company for a period of at least 6 and no more than 12 months, within their three-year contract. Failure to comply with the minimum timeframe required will result in the cancellation of the contract.

The researcher will have to sign a declaration stating:
- the commitment to actually carry out the compulsory research period in an enterprise (for at least 6 and no more than 12 months), stating that he/she is aware that failure to respect the minimum period of activity in the company will result in the cancellation of the research contract;
- to be aware that the initiative is co-financed by the European Social Fund REACT EU - National Operational Programme on Research and Innovation 2014-2020, through the Ministry of University and Research;
- to be aware that failure to comply with the provisions of Ministerial Decree No. 1062 of 10.08.2021 on the allocation of resources will result in the cancellation of the approved project and full reimbursement of the amounts received;
- to be aware that any change in the project objectives and expected results (where not previously authorised by the Ministry of University and Research) will result in the cancellation of the approved project and full reimbursement of the amounts received.

Given that the School shall report to the Ministry of University and Research every two months, the researcher shall submit a report indicating the time commitment and a summary of the main activities carried out.

Upon signature of the full-time fixed-term contract, the Administration will ask the researcher to submit the documentation required by law within 30 days.

All employment conditions are in accordance with the current laws in force also in regard to tax treatment, welfare and social security.

The annual gross salary of the researcher employed on a full-time fixed-term contract in accordance with Art. 24, paragraph 3, letter (a) of Art.24 of Law No. 240/10, is equivalent to the initial salary due to a full-time confirmed researcher (ricercatore confermato).

The research and teaching activities carried out by the researcher shall be in accordance with the contract, with the rules and codes of the School, and with the programming of the governing bodies of the School.

For anything that is not expressly covered in the present announcement, reference shall be made to the norms of Book V of the Italian Civil Code and current legislation on employment, with particular reference to Legislative Decree No. 165.
of 30.03.2001 "General rules on the organization of employment by public authorities".  
For all disciplinary issues, please refer to Art. 10 of Law No. 240/2010. 
The research and teaching activities of a researcher holding a contract in 
accordance with Art. 3, paragraph 1, letter a), of Law No. 240/2010 are evaluated 
in the last six months before the expiry of the contract. The assessment of the 
teaching and research activities takes place in accordance with the terms, criteria 
and parameters set out by Ministerial Decree No. 242/2011.

Art. 11
Prohibition of overlapping - incompatibility
The position of researcher on a fixed-term contract with SISSA is incompatible with 
any employment relationship, even if part-time. 
Notwithstanding Art. 53 of Legislative Decree No. 165 of 30.03.2001, a fixed-term 
research contract cannot be held while receiving other fellowships for a PhD 
course, research fellowships (assegni di ricerca) ex Art. 22 of Law No. 240/10, or 
other fellowships of whatever kind. The holder of the contract cannot 
simultaneously hold other fixed-term contracts with SISSA or with other 
universities.

Art. 12
Termination of employment
Termination of employment occurs upon expiry of the contract or withdrawal of one 
of the parties. If the selection procedure is revoked, the contract is terminated in 
any case. 
During the first two months, each party may terminate the contract at any time 
without prior notice and without penalties involving the recovery or the failure to 
pay the salary for the period of notice not given. The contract ends when the other 
party receives the notice of termination. Termination by the School must be duly 
motivated. After the above-mentioned period of time, in case of resignation the 
researcher must give at least a 30-day notice, by sending a written communication 
to the School’s Director. Failure to do so shall result in a penalty involving the 
recovery or the failure to pay the salary for the period of notice not given. 
In accordance with Art. 2119 of the Italian Civil Code, each of the parties may 
terminate the contract in presence of an event, even if temporary, which does not 
allow the continuation of the contract. The Administration may, in addition, 
withdraw from the contract for lawful dismissal for misconduct.
